

PRESS RELEASE

[FOR PUBLICATION FROM 23RD OCTOBER 2018]

Topic:

LEMONis5 & LIMEis5

A REFRESHING WAY TO REINVENT SPACES

WITH LEMONIS5 AND LIMEIS5 FROM INTERSTUHL

With its **LEMONis5** and **LIMEis5**, Interstuhl is introducing two new chairs for central office spaces and lounge, bar and exhibition areas. The **LEMONis5** club chair and **LIMEis5** barstool bring a fresh touch to traditional concepts of living areas, inspiring a reconceptualisation of space.

Inspiration needs space. With **LEMONis5** and **LIMEis5**, open spaces for discussion, creativity and revitalisation can be custom-designed and created. They combine perfect workmanship and attention to detail with a large selection of covers and colours. **LEMONis5** and **LIMEis5** impress both individually and as part of a harmonised duo. They exude classic elegance and a dynamic freshness.

The differentiation between the seat and backrest upholstery is not simply a characteristic design feature; it makes a large variety of cover and colour combinations possible. **LEMONis5** and **LIMEis5** are just as impressive in the details – from their high-quality materials to the impeccable stitching.

The **LEMONis5** club chair can be used in a wide range of environments and is available with a premium-quality aluminium star base or an elegant wooden frame. The base variant can be fitted with a smooth responsive rocking mechanism. It can also be used at both sofa height, which is normal for a club chair, and at a conventional table height. The base is available in 4-star and 5-star variants with a colour choice of black, brilliant silver or polished aluminium. It can be fitted with either castors or glides, depending on its application. With the wooden frame, **LEMONis5** is always at sofa height, with a colour choice of black, white or oak.

The height-adjustable **LIMEis5** barstool also features a premium-quality aluminium frame. A colour choice of black, brilliant silver or polished aluminium is similarly available for this chair. **LIMEis5** also boasts clever technical and design details. Its seat height adjustment range spans from 705 to 840 mm. Adjustments can be performed using an elegantly simple stainless steel

lever. The characteristic footrest brings out the fluid shape of the barstool, while the handle that is subtly integrated below the seat means that LIMEis5 can be transported comfortably.

Both LEMONis5 and LIMEis5 are characterful and bold standalone seating solutions for customised interior design. When used in combination, their harmonised shapes provide a more uniform and consistent aesthetic in indoor spaces. Perfect in a lounge, a trade fair or an office – the club chair and barstool are inspiringly versatile. They provide maximum freedom in interior design, enhancing new creative areas for discussion, work or relaxation.
